Description

Basic Coatings Emulsion PRO Advanced Oil and Water Wood Floor Finish & Sealer (semi-gloss finish): As a breakthrough in value, Emulsion PRO has what so many waterbased coatings don't - the warm, rich, amber tones of an oil-based finish. Emulsion PRO is self-sealing, VOC compliant and has an oxidative cross-linked urethane system that produces better wear properties than traditional oil finishes. Emulsion PRO is a professional grade self-sealing, low foam, dual crosslinking polyurethane system designed for use in a variety of wood floor applications. Emulsion PRO adds a rich amber color, much like an oil, with fast dry times and superior application properties.
