Description

Powernail 50P 18 Gage Pneumatic Nailer is a pneumatic Powernailr nailer designed for 18 gage cleats. The Powernail 50P 18 Gage Pneumatic Nailer is recommended for use on 3/8", 1/2" and 5/8" Tongue and Groove flooring as well as some 3/4" exotics, bamboo, and other solid or engineered wood flooring. The Powernail 50P nailer uses a thinner 18 gage cleat that is less likely to split the tongue on thinner woods. It is also recommended for flooring that is a very hard species like hickory. Many of the hard exotics available today require a thinner cleat to penetrate without splitting the tongue. The standard configuration is (L/S), Long Handle with Short Channel, which holds 100 Powercleats®. Long handle configuration provides 18" height from floor to handle grip.

manufacturer part# 02-50P00LSW

made in USA
